## About Us

**Impact Hub Lagos**, a member of the Impact Hub global network, is part of a rapidly expanding, diverse collective of **collaborative spaces**, vibrant **entrepreneurial communities**, and **capacity building programs** that inspire, connect and enable impact

**Impact Hub Lagos** aims to help individuals all over the world move from intention to impact by serving as a springboard for exploring ideas and sharing knowledge; a **curator** of innovation through labs, learning spaces, incubation and acceleration programs and as **facilitator** of essential resources and capital

**15,000+ members • 102 cities • 50 countries**

## Our Mission

Our mission is to inspire, connect and enable entrepreneurs so that they can learn, create and scale supported by a powerful ecosystem and a vibrant community

### Our key objectives are

- To help businesses scale  
10 years from now, we want to see the top companies on the Nigeria Stock Exchange being entrepreneurial ventures that have scaled
- To change the way entrepreneurs work  
By rolling out our unique collaborative model (inspiration, infrastructure, community, content and enablement) and providing the supporting structures that facilitate entrepreneurship
- To impact our world  
Along with our 'makers', we will transform the many problems being faced in Lagos and elsewhere into opportunities that improve the lives of people and the world

## Our Facilities

We are at 14 Gerrard Road, Ikoyi, conveniently located on a thoroughfare but set back from the road for privacy and quiet

60

Co-working spaces

35

Private office seats

200+

Event space capacity

1,500

Useable space (sq. m.)

12+

Spacious conference room

40

Adequate parking

## Our Space

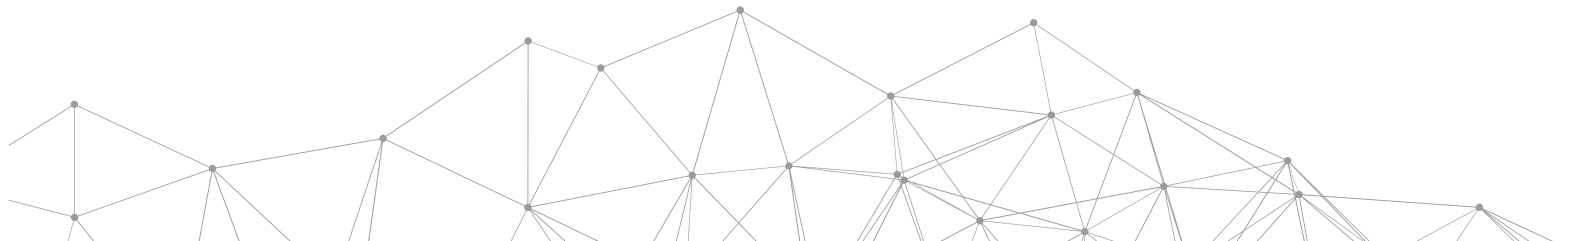

Impact Hub Lagos is perfectly positioned to create great co-working spaces that are modern yet comfortable. Our spaces foster collaboration for individuals and groups. They are uniquely designed creative environments that provide infrastructure to support work, meeting and learning

## Events and Community

Impact Hub Lagos fosters collaborative learning and thought leadership through networking events, workshops or extended programs to take the initiatives of our participants to the next level. From fire side chats, masterclasses, meet-ups to business clinics – we create resonating touchpoints that provide value to community members in terms of their network, knowledge and business growth. We also host corporate events for our members and the entrepreneurial ecosystem.

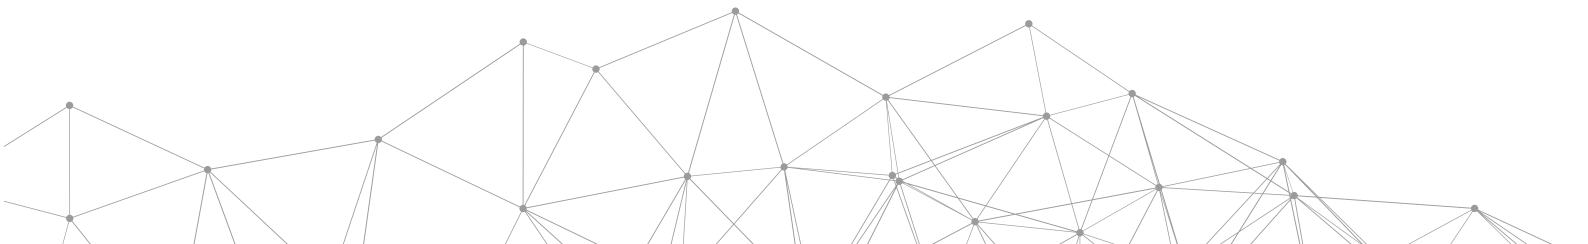

## Programmes

As part of our ongoing commitment to developing and supporting the success of our members, Impact Hub Lagos provides a range of programs to accelerate your learning, help you meet great talent, and connect with new collaborators. These programs include:

- Hackathons
- Master Classes
- Customised Bootcamps (CB)
- Incubation and Acceleration
- Women in Tech (WIT)
- Maker Programmes (MP)

## Hackathons

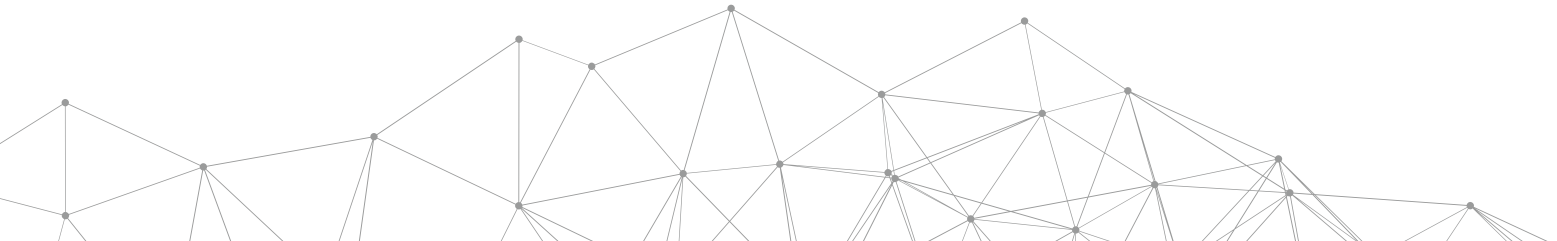

Marathon design thinking events where teams work hands-on in 24-48 hours to create solutions to specific problems in the ecosystem

## Masterclasses

Our master classes focus on specific blocks of courses from our entrepreneurship curriculum led by experts in the field. Suitable for intrapreneurs and entrepreneurs alike

## Women in Technology (WiT)

Targeted at women and particularly moms, many of whom tend to off-ramp due to the pressures associated with juggling career and family, this entry-level course offering is a blended learning experience of talks from industry leads, business insights, tech literacy, UX design and conceptual understanding along with hands-on practical application of coding.

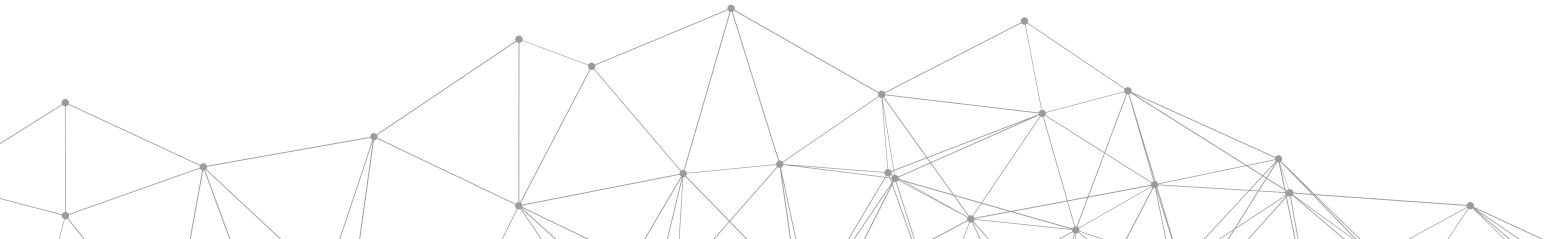

## Customised Bootcamps (CB)

These are industry-specific bootcamps focused on agriculture, healthcare and wellness, green energy, financial inclusion and other priority areas. We expect these will follow from our HackLagos series and other annual events, as well as be driven by specific interests of aligned sponsors.

## Maker Programmes (MP)

Hardware enthusiasts and keen 'makers' will have a blast at our MakerSpace crafting ideas into tangible products and creating prototypes for the design world, manufacturing, 3D printing, robotics, building prototypes and hardware. Specific programmes span design thinking, design challenges and maker training courses.

## Incubation

Our incubation programme helps kickstart young businesses. We take businesses from idea or Minimum Viable Product (MVP) phase and rapidly propel them to early or late growth phase.

## Acceleration

Our Business Acceleration Program helps to support the growth and development of business entrepreneurs. We have worked with our network partners to create, share and integrate coordinated entrepreneurship services. Together we help innovative entrepreneurs develop the skills and opportunities they need to successfully scale.

## Consulting and Business Support

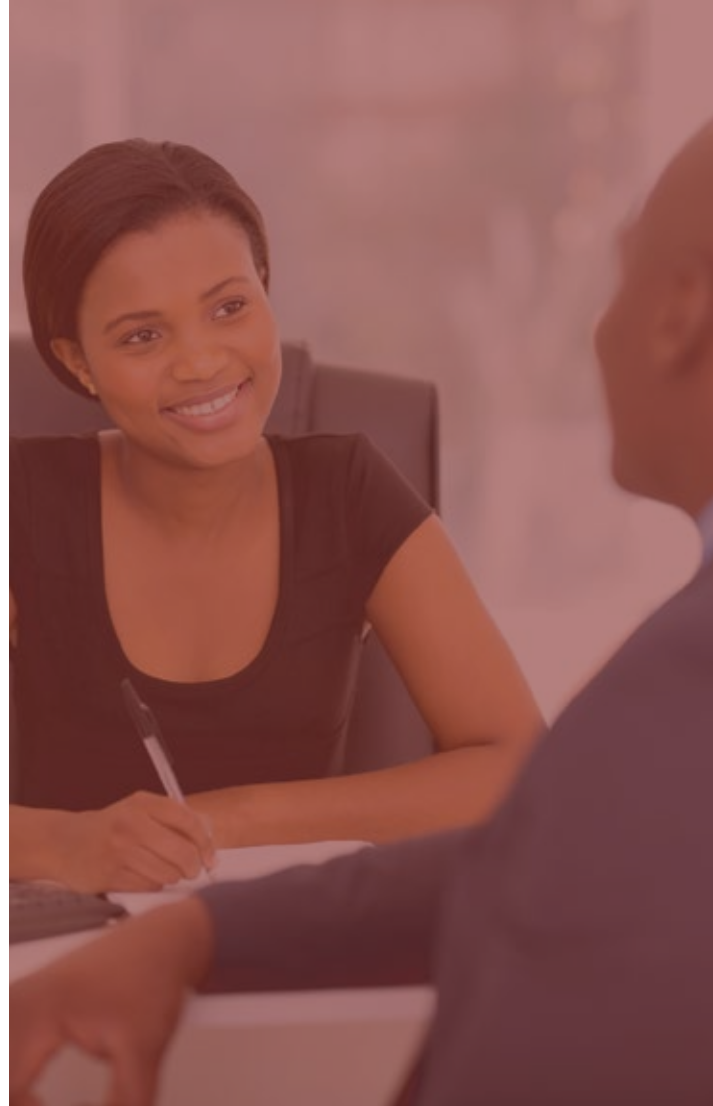

We support our members as they build their businesses by providing a range of services under which include:

### Traditional Consulting

- Business clinic
- Business planning / feasibility studies
- Corporate strategy
- Financial modelling
- Financial advisory / incubation services

### Business Support (delivered by partners)

- Human Capital Management
- Finance
- Legal
- Marketing
- Digital marketing and SOA
- Branding

# Value Proposition
